JURA S8 Chrome

Big choice, compact design

The stylish S8 creates the full range of specialities from espresso to latte macchiato to a masterful standard of quality. With just a touch on the colour touchscreen display, one of 15 different specialities flows into the cup. This is thanks to several outstanding innovations. The AromaG3 grinder is now even more precise and twice as fast, yet preserves all the delicious aroma of the coffee beans. The Pulse Extraction Process (P.E.P.®) ensures the optimum extraction time for short specialities and delivers a taste explosion for espresso and ristretto. Trend specialities finished with milk and milk foam are brought to perfection thanks to fine foam technology.

Thoroughly modern operating concept

The integrated 4.3" high-resolution color touchscreen display makes the machine incredibly simple to operate. A gentle touch with your fingertip on the screen, and your favorite beverage flows into the cup. The innovative operating concept with an eye-catching screen succeeds because it is so clear, simple and modern. Graphics and animations show every step of preparation, guiding the user through the process. The concept is designed to help you find what you want quickly. Individual preferences can be programmed in a few easy steps, allowing you to rename, move, copy or duplicate products in no time. If preferred, you can also control the coffee machine with the free, continually updated JURA Coffee App.

The ultimate milk foam

Characteristic JURA design reflects precision and quality down to the smallest detail. The new professional fine foam frother on the S8 is made from the highest quality materials and has a stunning look and feel. Specially designed for the preparation of speciality coffees with milk and milk foam, it makes latte macchiato and other beverages with the very best fine-textured foam – every time. Graphics and modern animations on the display make it easier than ever to use.
